

Part No: 9212

Our new generation Sound receiver/transmitter, the Envi BlueSound, was officially put to market during the fall of 2018.

Memocone Acoustic Mode

The BlueSound box is the interface between your Acoustic probe and the Pc-Logger. The microphone attached to the CPT-rods receives the acoustic signals from probe and transmits them to the BlueSound box which in turn sends the acoustic signals via Bluetooth™ to your Pc-Logger for real time presentation.

BlueSound complete edition

Envi BlueSound
Power cable*
Microphone
Microphone cable

Features of the BlueSound
